You need to recommend the appropriate technology to provide the predictive analytics for passenger pickup.

What should you do?

- A. Use Power BI to analyze the traffic data and PowerPivot to categorize the results.
- B. Use Hadoop on-premises to analyze the traffic and produce a report that shows high traffic zones.
- C. Use Machine Learning Studio to create a predictive model and publish the results as a web service.
- D. Use HDInsight to analyze the traffic data and write a .NET program to categorize the results.

Answer: C

Explanation:

* Scenario: Predictive Routing:

/ An Azure solution must be used for prediction systems.

/ Predictive analytics must be published as a web service and accessible by using the REST API.

* Microsoft Azure Machine Learning Studio is a collaborative visual development environment that enables you to build, test, and deploy predictive analytics solutions that operate on your data.

The Machine Learning service and development environment is cloud-based, provides compute resource and memory flexibility, and eliminates setup and installation concerns because you work through your web browser.
